

Datasheet

Import Formats

- XML
- HTML, XHTML
- SQL databases (ADO and ODBC)
- MS SQL Server 2000 XML.
- MS Word, PDF
- Text files, including flat and comma-separated files
- File-, FTP- and Mail directories.
- HTTP-request and user information.
- Unicode

Export Formats

- XML
- HTML, XHTML
- SQL
- Text
- Quark XPress
- Word, Excel, PDF
- Both PC and Mac formats can be created

Import/Export Protocols

- HTTP, HTTP-S
- SOAP/Web Services
- FTP, File and Email (SMTP)
- COM
- Imported and exported data can be validated using XML Schemas.

Advertising Standards

- AdsML Envelope 1.0
- IfraAdConnexion 1.1 and 2.0

Systems Integration

- Join data from different databases.
- Integrate databases and documents.
- Fully integrated with JavaScript and VBScript.
- Open architecture
- Extend the functionality with your own .Net or COM components.
- Direct access to the XML DOM(Document Object Model).

Data transformation

- String conversion and manipulation.
- Support for regular expression pattern matching and string conversions.
- Relate and join XML data from different data sources.
- Parsing of free text files into XML
- Summarise, group and aggregate XML data.
- Auto mark-up of SQL data
- Create persistent XML look-up tables.
- Inline XSL-T transformation.
- Copy and move XML-elements between different XML documents
- Generate unique key lists.
- Extract and remove XML-elements.
- Random, date and math functions

Caching

- Cache to off-load databases and other sources.
- Caching of look up tables and TPA data
- Control refresh rate

Minimum System Requirements

Hardware

- 1 GHz processor,
- 500 MByte internal memory,
- 10 MByte (AdeTransact) plus 500 MByte (working data) disc memory or better.

Server software

- Windows 2000 or 2003,
- .Net version 1.1,
- FTP,
- IIS 5.0 or better,
- MS MQ 2.0 or 3.0.

Ad^eTransact
